Keywords: Analysis of the characteristics of international financial market development

1. Introduction

China joins the World Trade Organization,Theundoubtedly brings new to the development of our enterprisesOpportunities and challenges.developing trends and characteristics of international financial markets,Clear nowDevelopment features of international financial markets,and according to the development requirements of domestic enterprises,make moreplus elaborate development plan,can be effective in the fierce competition in the market fully upgrade the EnterpriseComprehensive competitive strength,in making our enterprises better economic benefitsat the same time,also lays a solid foundation for our social and economic development and provides a powerful pushpower.

2. The basic characteristics of the current situation of international financial markets

The basic characteristics of the current situation of international financial market,main can nowThe basic features of the international financial market situation are summarized as follows:

2.1. the Overall situation of the current international financial markets is relatively stable

as the international economy continues to recover,thevast majority of the euro-zone's most heavily indebted countries now have adebt problem with a,also gets a certain amount of effective resolution,At the same time, the high-risk capital of many countries isgradually showing a callback.(Isprimarily U.S..so the international goldtheoverall development trend of the market is also gradually showing a state of détente,in theenvironmentand its overall trend is relatively stable.

But because of the relatively high complexity of the structure of the international financial markets,so manyhaveA stable trend of economic problems can easily be broken by minor economic changes,Enterprise inthedevelopment process still requires long-term vigilance'

2.2. capital in international financial markets presents a reversal of flows

TheStructural distribution of capital in the current international financial markets has also resulted in a greaterChange in the,progressively show""South rise North DropThe development features of the""."south-liter north-down"The gradual presentation of the characteristics of economic capital,makes the development of emerging markets very slow,in turn, there is a phenomenon of capital showing a reversal of the flow.Theprimary cause of this behavior is thefor developing countries to accelerate,The development of economically advanced countriesThe caused by a gradual increase in speed.

2.3. structural differentiation of credit in international financial markets

Due to the gradual recovery of the world's economy, the credit structure of international financial markets also starts to show a trend of differentiation. This trend in the international financial markets with the body performance of two aspects:

The structural polarization of the developing economy and developed economies is becoming increasingly prominent. At the same time, by the impact of the overall trend of inflation on the developing economy is more pronounced, requires expedited reform of its own monetary policy.

The polarization of developed economies and short-term interest rates presents a trend of long-term differentiation. Show the basic characteristics of the situation of international financial market at present, the overall situation of the current international financial market field is relatively stable, in which the capital that it has appears to be in reverse direction trend at the same time, its credit structure is fragmented and the developed economy has long been divided into short-term interest rates for the developing the basic features of the international financial markets, can be the international financial market field trends thinking and exploring provide a clearer idea of how to explore, then for our country enterprise in the fierce international competition market pointed out more scientific development direction.

3. Factors affecting the development trend of international financial markets
