Its ills are generally recognized because it highlights three major issues: first for governments and cities field, Public and private, balance issues between visible and invisible; Next is how to achieve sustainable, Environment -friendly, low-carbon economy long, to Avoid aggravating global warming.; The third issue is the principle of to re-examine itself, either a significant portion of the person cannot Enjoy the fruits of economic growth, or must change richer countries middle class lifestyle 5. Now that the neoliberal economy is out Show mode is plagued by, Change and adjust natural is increasingly becoming the common mood and public opinion of the world. Main. The Neo-liberalism of the West was not as dead as some people had said in the aftermath of the international the financial crisis., opposite, It's not only remains stubbornly entrenched in the western monopoly bourgeoisie, And it also has a certain market for the, the general developing countries. This has been introduced from the western countries the Home at the expense of the interests of the vast majority of people to continue the dimension the Fact of the crisis of protecting monopoly capital, from _ Some developments The state continues to implement the neoliberal " Democratic reform " cause politics can be proven in turbulent facts.

Even in our country, which successfully responded to the international financial crisis, the , also There's a new libertarian noise from time to time , noise coming . 2. State capitalism to rise again

State Capitalism returns strongly after the financial crisis, Heavy again up, becoming a common consensus in the world opinion is rarely disputed. Russia scholar Alexei• Kiwa on, State capitalism this mode type, "" Many countries are using, and a different political system. Home both single-party countries, There are multi-party countries. This mode is essentially, progressively, phases to form market economy and generation. The democratic creation of the table format do not do 'great leap 'Don't do 'Hugh grams therapy' does not destroy the economy, does not reduce the standard of living of the population. do not break social system, Do not break The traditional, do not break the original Customs and Morals. "[[] "have Western media say, Many emerging states are taking the state of capitalist development model, its common special point is: On the one hand encourage private enterprises and foreign investment, on the other hand controls Some core pillar industries, such as oil and automobile manufacturing, Expand these industries with government funds, and push it to the global market. Exactly these features of the state capitalism model, Make "China, "Countries and other such countries have amassed the world's largest country Home Wealth funds "," make these countries 'economic growth in the past for 10 years, is significantly higher than free Democracies economic growth speed [+].

In addition to strengthening government intervention has become the major capitalist countries home "bailout" and policy tools for boosting economic growth, State capital the important sign of the heavy rise of doctrine is, "from 2004 year to 2009 year, Enter the first time a state-owned company has boarded Forbes World Grand DukeDivision list, at the same time with Private companies withdrew from the rankings. State companies now control the world about 90% Oil, and its control over other resources also accounts for a large percentage "[14]. Significant increase in countries and global scope regulations, The more the public sector comes More Natural Resources, Finance is taking over, things like this class, are all evidence of the resurgence of state capitalism [[]].

Impact on the re-emergence of state capitalism, U.S. financial Big crocodile George • Soros view: currently dominates, We call it Multilateral system of international capitalism, not completely collapsed, but already heavy hit; Its inherent ills are exposed, and subject to challenges to the workaround of the row ----- The rise of China shows The form of an economic organization that is fundamentally different from the current international financial system. US era The Weekly also believes that : and Communism Camp different , Today's emerging countries capitalist countries -- main is China , Russia , and Persian Gulf Oil country -- has proven Their mode is very successful , This allows leaders even earlier in Before this crisis began to doubt democratic capitalism is not necessarily is the best economic development model . "[+] " There is a point of view of Fear, State capitalists combine government resources with innovation , to can cause European and American multinationals to be severely disadvantaged in global competition potential "[4] ". United Kingdom " economist " magazine editor Adrian • wu Ledrich (Adrian Wooldridge) also considers , " with country capitalism with a new posture strong rise , Western Free Capital main To face crisis . for development where you want to have a place in the world country , State capitalism is more attractive. . because This mode can " Let them have private enterprise many

years to build up strength.

Given the re-emergence of state capitalism, has an opinion that declares the To call "" Washington consensus for " Chinese mode " End of effect, and say " BRICS countries " leading the world "" after Washington a total " era." American historian Neil • Ferguson (Niall Ferguson) "": The world today looks different with toward, Now the financial crisis seems to prove that, free capitalism stands above what mud foot. Wall Street crashes, seems to be the only success has a knock-on effect on the Chinese government-controlled economy. people maybe think, The era of to agree with Beijing'' has arrived. "[/]

here only on state capitalism and the so-called China mode for Relationship to a point of view . Economic development in China because of resource bottlenecks bound , lack of dynamic and export-oriented development strategies in need of a "" Adjustment and other daunting global challenges that need to accelerate the transition to a way of development in our country per capita GNP and per capita national income in All rows in the world % around , Our country also has 1 millions of poor people Port , and our country will remain in the primary stage of socialism for a long time Basic conditions are not fundamentally changed , At home and abroad some people still insist that the BRICS countries represented by China are accelerating to the So-called after " Washington consensus " times forward , how inconsistent appropriate . This untimely appeal is worth pondering .. Union think of the beginning of the international financial crisis , The West gives us the preset each with China Accountability Tightly related theory , Policy trap , We think , do not follow the western discourse as the wind rotates "" Chinese mode Go , should not only be our rationale about self-consciousness , and it should be a moment we can't forget political responsibility .
